

Emergency Checklist (use with approved Citabria checklist)

ENGINE FAILURE

DURING TAKEOFF GROUND ROLL

Throttle.....Idle
Mixture.....Idle/ Cutoff
Magnetos.....Off
Master Switch.....Off

AFTER LIFTOFF/INITIAL CLIMB

Airspeed.....65 MPH

NOTE:

If possible land straight ahead, or maneuver away from obstacles.

Mixture.....Idle Cutoff
Magnetos.....Off
Master Switch.....Off

ENROUTE

Airspeed.....65 MPH
Landing Site.....Select
Magnetos.....Both On
Mixture.....Full Rich
Fuel Shutoff Valve.....Check On
Carburetor Heat.....On
Primer.....In and Locked
Ignition.....Engage if Prop Stopped

IF ENGINE DOESN'T RESTART

Communicate.....Advise ATC
Transponder.....Squawk 7700
Passengers.....Brief
Forced Landings Checklist.....Complete

FORCED LANDING

Airspeed.....65 MPH
Mixture.....Idle Cut-Off
Fuel Shutoff Valve.....Off
Carburetor Heat.....Off
Magnetos.....Off
Electrical Switches.....All Off
Door.....Unlatch
Touchdown.....Three Point Full Stall on Rough Terrain

ENGINE FIRE ON GROUND

Fire Confined to Intake or Exhaust System:
Ignition.....Continue Cranking
Mixture.....Idle Cut-Off
Throttle.....Full Open
Aircraft.....Inspect

Fire Persists or Not Limited to Intake or Exhaust:
Mixture.....Idle Cut-Off
Fuel Shutoff Valve.....Off
Electrical and Magneto Switches.....All Off
Aircraft.....Exit
